

I'm not into metal\*

“Last year I had orthognathic surgery to reposition my jaws. I chose biodegradable plates and screws because I do not want permanent implants inside me for the rest of my life.”

\*98 % of people accept biodegradables for maxillofacial fixation *Turvey TA. EACMFS - XVII Congress 2004.*

# I'm back in my natural form\*

“Some time ago I had a severe riding accident, and luckily biodegradable implants were used to fix my broken jaw. They degrade after some time and I am glad to be back quickly in my natural form.”

\*98 % of people accept biodegradables for maxillofacial fixation *Turvey TA. EACMFS - XVII Congress 2004.*

## Inion CPS® – A new era in biodegradables

Inion's proven products for CMF applications biodegrade into carbon dioxide and water, thus avoiding the risks of removal while providing adequate fixation strength and gradual transfer of load to bone during the healing process. No wonder patient acceptance of such materials is very high.\*
